Prior to being involved with Herbalife, I was a Personal Assistant in an advertising agency but that job within that corporate environment was never going to fulfill my ultimate dreams.

I was working extremely long hours, with little or no thanks and no extra financial remuneration, and I became very unhappy and frustrated so I began looking for other opportunities.

My partner at the time invited me to attend a presentation for 'my opinion'. I was fascinated by people's results who were using the Herbalife products. Having my own health challenges at the time, as well as being dissatisfied at work, I saw Herbalife not only as a solution for my health, but also as a potential career opportunity.

I started immediately as a Distributor and using the products. Very quickly my energy levels increased, I lost a dress size, and the best part was I lost 6kg in a month. I later went on to easily lose the 16kg that I had put on after the birth of each of my two boys. I'm in better shape now today than I ever have been!

Very quickly I started to earn \$1500 a month working part-time, around my full-time job. Within my first year of becoming a Distributor my part-time income almost equaled my full-time wage, which gave me the confidence to pursue my Herbalife career full-time.

I have worked at my Herbalife Distributorship very seriously from day one, and knew this was my best opportunity to pursue financial independence and the dream lifestyle I deeply desired.

I love my life! I have been self-employed since I was 23 years old (18 years), and have enjoyed the incredible lifestyle that Herbalife can provide. I've been able to travel the world many times over, live in a beautiful home, and have been able to run my business around my children as they continue to grow, and not miss a moment in their lives.

I feel incredibly secure about my future and happy about the choices I have made in my life.
